

Science Knows

Music and Lyrics by Peter Tam copyright © 1998

G

A long time ago in ancient Greece,

G

C

they talked about shapes and *geometry*

G

Sir Isaac Newton watched an apple drop,

G

C

and so he discovered *gravity*

F

C

Galileo invented the telescope,

G

C

making his planets *discovery*

F

E is equal M C square ($E=MC^2$),

G

C

Mr. Einstein and his *relativity*

(CHOURS)

F

C

There's science here, there's science there

G

C

Science is around us, science everywhere

Why the sun shines? and the moon glows?

G

What is a star?...

C

...Only science knows

Answers: 1) Pythagorean theorem 2) Water 3) Genetic Code (deoxyribonucleic acid), 4) Speed of light.

A whale is a mammal it is not a fish,
we know about life from **Biology**

Stars and planets in our universe,
we learn about them in **Astronomy**

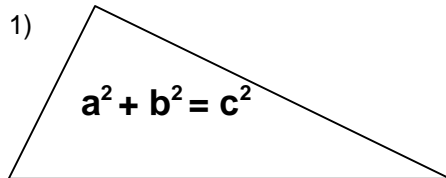

Dinosaurs hunters digging up bone,
they're people in **Paleontology**

Every thing you see and all around us,
its all about **Physic** and **Chemistry**

(CHOURS)
There's science here.....

What are these things, why is it so
How does it work.....
... ..Only science knows

2) H^2O

3) DNA

4) *299,792,458 meters per second*

Do you know what these things above are?
